The Joslyn Institute has been re- 
listed by UN-Habitat to host the 
Urban Thinkers Campus November 
16–17 in Omaha as part of the 
World Urban Campaign: Initiative 
The City We Need. This pro-
gram is one of 36 selected world-
wide, and one of only two selected 
in the United States.

JISC's proposal, The City We 
Need: A Declaration of Urban 
Sustainability (or Zilma and Mill-Gate Plants), centers on 
the understanding that more than 
70 percent of the world's popula-
tion lives in urban environments 
without access to clean and sustainable 
water.

A natural resource is the subject 
Mr. James Keckler, an architecture and building 
faculty member at the University of Nebraska College 
of Architecture, Landscape Architecture, and Design, 
was enlisted in this endeavor: A  
number of partners have 
worked closely with University 
Cooperative Extension, UNL College of 
Architecture, Landscape Architecture, and Design, to 
create the Green Roof Project.

Clean-up is Success 

- The 2015–16 E.N. Thompson Forum 

- JISC to Host Urban Thinkers Campus in November 

- NRDs Join Forces to Create Basin-Wide River Management Plan 

- Some of Nebraska’s groundwater 

- New发展战略 to create the Green Roof
